DETAIL ACTION

Reasons For Allowance

- 1. Claims 1-5 are allowed.
- 2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose a circuit as well as method for automatically adjusting an operation voltage of an active matrix organic light emitting diode (AMOLED) in order to maintain stable current through the OLED for ensuring qualified image by comprising a display panel of an AMOLED having a cathode terminal of an organic light emitting diode (MOLEDO) and an auto-adjusting circuit connected to the cathode terminal of the OLED, wherein a current passing through the cathode terminal of the OLED is detected by the auto-adjusting circuit, and a voltage applied to the cathode terminal of the OLED is adjusted by the auto-adjusting circuit according to the current detected as required in claims 1 and 5.
- 3. The remaining dependent claims are allowable for at least above reason.
- 4. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. Libsch et al. (US Pub. 2003/0095087) discloses data voltage current drive AMOLED pixel circuit. None of record prior arts stands alone or combination with others discloses all limitation required in claim invention.
